THE GLOBAL GOALS
For Sustainable Development

The Global Goals are the most ambitious agreement that world leaders have ever made. They cover everything from health and education to peace and justice. At Greatham Church of England Primary School, we aim to use these goals to form a lens through which the children can look at the most pressing global issues.

What are the Global Goals?

In 2015, leaders from the 193 countries of the United Nations met to discuss the world's problems and agreed on a plan to tackle them by the year 2030. They named this plan the Sustainable Development Goals — commonly known as the Global Goals.

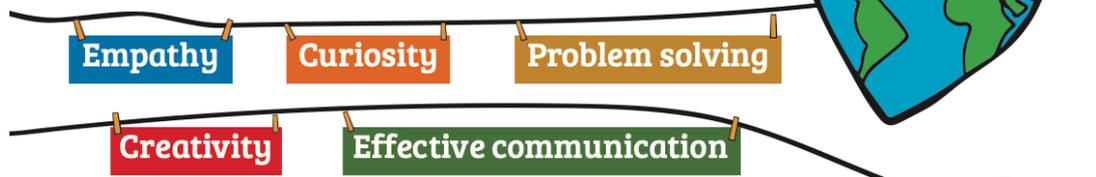

In their learning, the children will develop 5 key characteristics - empathy, curiosity, problem solving, creativity and communication.

Above all, we will aim to inspire a hopeful, positive outlook on our world and encourage children to make a positive contribution to our community.

The GLOBAL goals are relevant to every person, in every country, of every age. There are five key characteristics which, the children will develop as they explore the goals.

They are:

The children will be involved in weekly activities to investigate the goals and show courageous advocacy in making a change locally or globally.

We aim to embed these goals within our curriculum to increase the focus and draw on the children's knowledge and understanding to put them into context.

Early Years and Key Stage 1

Children in Early Years and Key Stage 1 will start their journey with the global goals by becoming an Explorer for the Global Goals. They will take part in shared learning experiences based on play to begin to explore big concepts like peace, home, community and nature

Key Stage 2

Each class will focus on a set of goals throughout their time in their phase. These have been selected on the basis of what matters to us and to enhance their learning across the curriculum.

Years 3 and 4 will focus on:

Years 5 and 6 will focus on:
